

EO08 EMBRACE OUTDOOR DINING CHAIR EOOS

DESCRIPTION

The Embrace Outdoor Series features highly finished wooden frames of solid, FSC®-certified, untreated teak – a highly durable wood type suitable for outdoor use. The chair is upholstered with an informal, soft cushion in water resistant Agora Life textile, creating an elegant contrast to the sleek wood. The chair can also be used without a cushion, giving the teak a more prominent role. The wooden frame, which is sanded and assembled by hand, is made to precise standards of craftsmanship and boasts several functional details, such as finger joints on the armrests and a truss assembly under the seat, which increases the stability of the chair while looking beautiful from every angle. The chair stacks 4 pieces for stable storage.

DESIGNER

EOOS is an Austrian collaborative design trio established in Vienna in 1995 by Martin Bergmann (b. 1963), Gernot Bohmann (b. 1968), and Harald Gründl (b. 1967). The trio was founded after they graduated from the Venetian University of Applied Arts. Today, the internationally renowned collaborative approaches complex furniture, product, and shop design by examining past roots in a contemporary context. EOOS views design as a poetic discipline, believing that end results should be able to accommodate changing needs and desires. Their unique design process focuses on myths, rituals and intuitive expressions, creating connections that extend beyond initial perceptions.
